

The power of connected minds.

We are the world's leading chemical company, with the best teams developing intelligent solutions for our customers and for a sustainable future. Our success as a company relies on the engagement of our employees. We encourage our employees to develop their strengths, and we recognize their achievements. For you, this means a wide variety of job roles, and exciting opportunities for learning and career development.

The BASF Group's Intermediates division develops, produces and markets a comprehensive portfolio of about 700 intermediates around the world. Its most important product groups include amines, diols, polyalcohols, acids and specialties. Intermediates are used for example as starting materials for coatings, plastics, pharmaceuticals, textiles, detergents and crop protectants. Innovative intermediates from BASF help to improve both the properties of final products and the efficiency of production processes. The ISO 9001 certified Intermediates division operates plants at production sites in Europe, Asia and North America.

Specialist / Manager, Product Management, Intermediates, Asia Pacific

The Intermediates division is now looking for high-potential talent who have entrepreneurial and commercial thinking, fast learning capability, and is flexible enough to adapt to changes. This position offers the opportunity to gain technical knowledge relating to Intermediates business and business acumen. Candidates with outstanding performance will have the prospect of progressing to the level of product manager overseeing the Transfer Specialties and Glyoxal business in Asia Pacific, with the following responsibilities:

- Manage the product line in Asia Pacific including strategic positioning, product growth and profitability, marketing and technical support
- Support the implementation of the business strategy through executing the appropriate product strategy to the sub-regions or countries
- Drive sales for relevant products and applications for the sub-business unit
- Actively build upon existing market intelligence and monitor for changes in market dynamics. Provide product and market intelligence to countries

Requirements

- A bachelor's or master's degree in Chemistry, Chemical Engineering or related disciplines with good academic results
- Relevant technical and/or commercial experience is preferred. Fresh graduate with prior internship experience will also be considered
- Open to new ideas and adopt different perspectives to develop value-adding solutions
- Interculturally oriented, with ability to adapt communication style and constantly check on others' understanding. Fluent in English and at least one Asian language
- Proactively incorporate feedback from customer/stakeholder interactions into decision-making
